- 10.____ he admired her looks and manners, he had no wish to marry her.
A.Although B.Since C.As long as D.As

三、阅读 4 篇（20*2 分）

Passage One

Last Saturday was a very busy day for Lily. She woke up early and quickly ate her breakfast. First, she had a piano lesson at 9:00 AM. Her teacher, Mrs. Smith, taught her a new song. Lily practiced it three times. "You’re getting better!" Mrs. Smith said with a smile.

After the piano lesson, Lily went to the park with her friends. They played soccer for an hour. Lily scored two goals! Then they sat under a big tree and shared sandwiches. Suddenly, it started to rain. They ran back home laughing.

In the afternoon, Lily’s family visited her grandparents. Her grandmother baked cookies, and her grandfather told funny stories. Lily helped her grandmother water the flowers in the garden. Before leaving, her grandparents gave her a box of chocolates.

That evening, Lily did her homework and watched a cartoon on TV. She went to bed at 10:00 PM, feeling tired but happy. "What a wonderful day!" she thought.

1. What did Lily do first on Saturday morning?
A. Played soccer
B. Ate lunch
C. Had a piano lesson
D. Visited her grandparents

2. Why did Lily and her friends run home?
A. They were hungry
C. The park closed
3. Where did Lily help water the flowers?
A. At school
C. At her grandparents' house
4. What did Lily's grandparents give her?
A. A piano book
C. A box of chocolates
5.How did Lily feel at the end of the day?
A. Sad and angry
C. Bored and sleepy
- B. It started to rain
D. They forgot their homework
B. In the park
D. In her own garden
B. A soccer ball
D. Cookies
B. Tired but happy
D. Excited but hungry

Passage Two

When you tidy your messy bedroom, it gets a lot easier to find things.Dreams may work the same way for a messy brain, helping you learn by organizing memories and ideas.

To test how much dreams can help learning, Robert Stick Gold had some students play a shape fitting game called Tetris for a few hours and then go to sleep.Soon they were dreaming of falling Tetris shapes.Interestingly, the worst Tetris players had the most Tetris dreams and improved their game the most.Similar tests have shown the same results for all kinds of skills.

As we dream, many important tasks are getting done.The brain decides what to keep and what to forget.It is connecting new experiences to older learning.In fact, the brain is learning all night long.

Another important task of dreams may be to help us deal with emotions.At night, emotions are in the driver's seat.People who have had an upsetting experience often dream about it afterward.Often the dream event changes somehow—another way the brain tries to make the memory less upset.So if your best friend moves away, you might dream that you're the one who's moving.In fact, dreams have a proven power to improve mood, and people who dream about what's bothering them usually feel better sooner than those who don't.

Everybody dreams for a couple of hours every night—in the course of your life, you'll spend about 25 years asleep and 6 years dreaming.There's probably no single answer to the question why we dream, but there doesn't have to be.One dream might help you remember your math facts, while another might lead to a new invention, or give you a fun, crazy story to tell your friends.It's all in a night's work for our busy, mysterious brains.

- 6.Robert Stickgold's test shows that_____.
A.games are useful for memory
C.players stop learning in dreams
7.We can learn from Paragraph 4 that_____.
- B.dreams can help improve skills
D.tasks can only be settled through dreams
B.only drivers can deal with emotions
D.dreams can copy what one experienced

- 8.Which of the following does the author probably agree with?
A.Dreaming does harm to one's mood.
B.Dreaming affects the quality of sleep.
C.It's hard to find out the secrets of dreaming.
D.It's not so important to know the cause of dreaming.
- 9.What does the text focus on?
A.Dreams and memories.
C.The benefits of dreams.
10.In which part of a magazine can this text be found?
A.Entertainment
- B.Dreams and emotions.
D.The patterns of dreams.
B.Tourism
C.Science
D.Advertisement

Passage Three

An older friend once gave me a piece of advice."Enjoy the last few weeks of college," she said,"since college is the best time of your life."

This was not the first time I'd heard such a statement, but with graduation fast coming close, her words especially struck me.It seemed a bit disappointing to reach one's life peak at only 22 years of age, but in her opinion, college had been one of the best times in my life so far.I made friends, took classes, and learned a great deal about myself.But I was also excited for the time after college—moving to a new city, starting a new job, and becoming a "real"person.I hoped that my great dreams were practical.

Then, last week I read a column in Real Simple Magazine called "100 Years of Attitude", in which women 100 years or older shared their life experiences and views.I noticed that none of them considered college as the "best" time of their life.Not all of them went to college, but still in most cases their teens and twenties were not the best times of their life.They said some of their favorite times were raising their children, traveling after retirement, and even enjoying their present time and age.

Enjoying one's present time and age was a clear theme of the interviews.A piece of advice given by the women was about the importance of making the best of all situations.I think it more accurate than that of my friend; I can say with certainty that if I am lucky enough to make it to 100.I refuse to spend the last 80 years of my life plummeting downhill, or even leveling off.

I am sure that our eagerness and devotion will make us college students live a meaningful life.We will not just look backwards or miss our college days.We will look forward in excitement about continued journey uphill.

- 11.Which of the following opinions does the writer agree with?
A.College is the best time of one's life.
B.Twenties were the best time of the old people.
C.One should make the best of all situations.
D.One should not look backwards at their college time.
- 12.In the second paragraph, the writer wants to say____.
A.her achievements in college would be the peak of her success

- B.she is looking forward to living as a "real" person in college
C.she becomes more and more uneasy with graduation
D.she is satisfied with the college life but is hopeful for the future
- 13.The column the writer read is mainly about those old women's_____.
A.best time of life at youth B.life experiences and views
C.different opinions about life D.favorite time with best friends
- 14.By saying "I refuse to spend the last 80 years of my life plummeting downhill, or even leveling off"(in Paragraph 4), the writer really means _____.
A.she will not spend the rest of her time at college
B.she will not just obtain a college level certificate
C.she will not be satisfied with what she has already accomplished
D.she will not be content with the life in the future
- 15.Which of the following words can be used to describe the writer?
A.Ambitious. B.Practical. C.Imaginative. D.Proud.

Passage Four

- Part of a research study, by scientists at McMaster University, which is ongoing into the influence of drinking milk after heavy weightlifting, has observed that milk helps exercisers burn more fat.
- The scientists took three groups of young men 18 to 30 years of age, 56 in total, and put them through a strict, five days per week weightlifting program over a 12 week period.Following their workouts, study participants drank either two cups of skim milk, or a soy beverage with equivalent amounts of protein and energy, or a carbohydrate beverage with an equivalent amount of energy.
- Upon the study's conclusion, scientists observed that: the milk drinking group had lost nearly twice as much fat—two pounds—as those in the carbohydrate beverage group, who lost one pound of fat.Those drinking soy lost no fat.At the same time, the gain in muscle was much greater among the milk drinkers than either the soy or carbohydrate beverage participants.
- As published in the first stage of the study, the milk drinking group came out on top in terms of muscle gain with an estimated 40 percent or 2.5 pounds more muscle mass than the soy beverage drinkers.In addition, this group gained 63 percent or 3.3 pounds more muscle mass than the carbohydrate beverage drinkers.
- "I think the evidence is beginning to increase," says Stuart Phillips—the leader of the study."Milk may be best known for its calcium content in supporting bone health, but our research,and later others', can continually support milk's ability to aid in muscle growth and also promote body fat loss.Milk is the ideal post workout drink for recreational exercisers and athletes alike."
- 16.According to the study, which is the best drink for exercisers to lose weight?
A.Fruit juice. B.Soy beverage. C.Skim milk. D.Carbohydrate beverage.
- 17.From the passage we can learn that milk has a good effect on all of the following EXCEPT _____.
A.muscle gain B.brain development C.bone health D.fat loss

- 18.According to the passage, we can know that _____.
A.the scientists chose people aged 18, 30 and 56 as participants of the research
B.the weightlifting program which study participants attended was 84 days in total
C.people who drink milk every day are always healthier and thinner than others
D.soy beverages are better than carbohydrate beverages for exercisers to gain muscle
- 19.What does Philips want to tell us?
A.More evidence is needed to strengthen their research.
B.Milk has more calcium than soy or carbohydrate beverages.
C.The calcium in milk can also help gain muscle and lose fat.
D.Athletes should be forbidden to drink other beverages except milk.
- 20.What does the passage mainly talk about?
A.What exercisers should do to lose weight.
B.How milk influences people's health and figure.
C.The differences between milk and soy or carbohydrate beverages.
D.A research on the effect of drinking milk—gain muscle and lose fat.

四、十五选十（10*1 分）

A Nepali teenager has designed a £23 solar panel using human hair.Milan Karki, who is 18 years old and lives in a village in rural Nepal, used human hair to replace silicon, which is a common but 31 component of solar panels.By using hair as a 32, Karki said that solar panels can be produced for around £ 23, a price tag that could be 33 if they were mass-produced.

The solar panel works because melanin, the pigment that gives hair its color, is light 34 and can act as an electrical conductor.Karki was inspired to follow this 35 by a Stephen Hawking’s book, which 36 how to create static energy from hair.

The device that Karki has 37 is capable of producing 9V or 18W of energy--plenty to 38 a mobile phone "Half a kilo of hair can be bought for only £16 in Nepal and whereas a pack of batteries would cost £50 and last a few nights" according to The Daily Mail.Milan and his four classmates 39 made the solar panel as an experiment but the teens are 40 it has wide applicability and commercial viability.Karki has now sent out several devices to other districts near his home for testing.He said, “First I wanted to provide electricity for my home, then my village.Now I am thinking for the whole world.”

六、中译英（5*3 分）

- 61._____ (教育发挥了相当大的作用)in the development of a country.
- 62.However difficult it is, _____ (政府都将采取必要的措施).
- 63.As a Senior Three student, _____ (我已习惯了用功学习).
- 64.When was it that _____ (才开始意识到地理非常值得学习)?
- 65.Thanks to the heavy rain, the big forest fire _____ (持续了一个半月)was put out at last.

七、英译中（5*3 分）

Every year, approximately 1.6 billion tons of soil flows into the Yellow River, China's second longest river.The soil contains materials to keep the natural balance of the area.Over time, a lot of soil has been removed, which has caused serious erosion of the land along the River.In some areas in Shanxi Province, this has destroyed almost all the land, and has forced many local farmers to move to other areas.

It is a huge job to control Yellow River erosion .66.Many people believe this kind of work is best done by government or international organizations.You may agree with this point of view.If so, it is time for you to think again.

67.In fact, it is you who have the most important role to play in stopping Yellow River erosion.Did you know the importance of your 5 yuan? 68.For a start, it can buy you a tree, which will help make soil stay on the land.On land with rich soil, local farmers can grow crops to make a living.With the money they earn from their crops, farmers buy goods or services.This helps to develop local economies.

Still puzzled how your 5 yuan can have so much effect? Well, just take a look at the fact below.Since 1997, a tree-planting programme has changed the Jiuchengong Valley in Inner Mongolia into a green homeland.69.Visitors from all over the world now come to admire this great achievement.What is more, the success of the programme has greatly improved the lives of the local people.Just think, all this started with 5 yuan! So when you have 5yuan in your pocket next time, think twice about how to use the money.70.Remember you can use it to buy a tree and create a green future for our motherland, our people and yourself.

66.Many people believe this kind of work is best done by government or international organizations.

67.In fact, it is you who have the most important role to play in stopping Yellow River erosion.

68.For a start, it can buy you a tree, which will help make soil stay on the land.

69.Visitors from all over the world now come to admire this great achievement.

70.Remember you can use it to buy a tree and create a green future for our motherland, our people and yourself.
